Basic Table Setting Method

a. Assembly Line Technique
- One server sets one particular item at a time on all the tables (e.g., all forks, all knives, etc.)

b. Station Set
One server (or team) is responsible for setting all the items on his/her (their) particular station. With this method, well organized and combined efforts increase efficiency and decrease setup time.

Table/station assignments can be made prior to the pre-meal briefing with any additional questions/details regarding assignments discussed during the briefing.

THE ULTIMATE SEO CHECKLIST

NEVER FORGET ANYTHING ABOUT SEO AGAIN

RESEARCH

Market Research

- Use Google Trends to see how your market is growing
- Use Google Keyword Planner to see what keywords are popular
- Use SEMrush to see what keywords your competitors are using

Niche Research

- Use Google Trends to see how your niche is growing
